

Stainless Steel Valves

For Life sciences, Harsh Environments,
Food & Healthy Beverage Dispensing

ENGINEERING YOUR SUCCESS.

Parker Fluid Control Division Europe - FCDE

Parker Hannifin

Parker Hannifin is the world's leading diversified manufacturer of motion and control technologies and systems, providing precision-engineered solutions for a wide variety of commercial, mobile, industrial, life science and aerospace markets.

The company's products are vital to virtually everything that moves or requires control, including the manufacture and processing of raw materials, durable goods, infrastructure development and all forms of transport.

Fluid Control Division Europe

The Fluid Control Division in Europe (FCDE) is a division of Parker Hannifin, the global leader in motion and control technologies.

FCDE core competences are the development and manufacturing of an extremely diverse range of fluid control products, including solenoid valves and pressure regulators.

Parker Fluidic Solutions (PFS) is a global designer and manufacturer of bespoke integrated system solutions. Renowned globally for solutions in high technology, fluid and motion control utilising advanced design and manufacturing techniques. PFS is focused on incorporating the best of Parker products into solutions designed for you.

History

Parker FCDE has been a leading player in the manufacturing and development of solenoid valve technologies for over 60 years, with continuous research and development bringing innovative solutions to the marketplace, for example leading the way in the utilisation of synthetic ruby for critical water applications or the unsurpassed reliability and precision of our pressure regulators. The expertise accumulated and developed through the years is evident in the superior quality of FCDE solutions.

Markets

Our products and solutions are typically designed for markets including Industrial Equipment, Industrial Automation, Mobile, Transportation, Life Sciences, Beverage dispensing and for Fluid and Process Control.

Benefits

The modular concept of our products, having separate solenoid valves and electrical parts, provides the customer with increased flexibility by allowing numerous combinations. This additional flexibility can enable distributors to greater reduce valve inventory levels, whilst retaining the same number of capabilities. Parker also has unrivalled experience in developing customised product solutions complying with the highest technical, environmental, energy and service life requirements.

WARNING - USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

• This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

• The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

• To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

201/202/301LG Series

Product Description

High grade material and corrosion resistant 201, 202, 301LG Valve Series is a complete range of 2 way and 3 way valves, direct acting, normally close and normally open.

This new range of solenoid valves, having AISI 316L grade stainless steel body, is the right answer for a wide range of applications in Food & Beverage Industry, Process industry, Wastewater treatment appliances, Marine, high temperature steam applications in aggressive environments or with aggressive media.

FFKM seal is available in order to increase mechanical, high temperature and aggressive media resistance for the most specific and demanding fluid control applications.

Thanks to the modular concept, a wide range of electrical parts can be used including ATEX, IP67, H class, reduced power, UL or VDE approved.

This selection of valves is NSF certified with mechanical ATEX approval available.

Applications

Market of interest:

- Life Sciences
- Food & Beverage Processing
- Commercial Equipment
- Industrial equipment
- Waste Water treatment

Typical applications:

- Water purification and preparation devices
- Food & Beverage processing, Healthy Beverage Dispense equipment
- Demineralized water shut off, cooling of medical and surgical devices
- Dishwasher disinfectors, Laboratory and high end hot steam sterilizers
- Compatible aggressive liquids shut-off
- Ammonia (with silver shading ring version)

Benefits

The most valuable features you will find in this product range:

- High grade corrosion resistant valve body, AISI 316L
- NSF certified references
- FFKM seal option for superior endurance in heavy duty conditions
- Modular concept: a wide range of electrical parts can be used with this family, including ATEX, low power, IP67, UL/VDE approved
- Robust and solid design

General Description

Materials in contact with the fluid

Valve Body & Seat:

AISI 316L Stainless Steel

Tube assembly:

AISI 303 Stainless Steel

Plungers:

AISI 430F Stainless Steel

Springs:

AISI 302 Stainless Steel

Seals:

FKM FDA, FFKM

Shading ring:

Copper: standard

Silver: according to notes

Installation

The valves can be mounted in any position. It is however recommended to install them with the coil in vertical position above the body.

Media

These valves have been developed to achieve the best performances with a wide range of media.

Coil

A wide range of coils can be used with this range.
The complete coil range is described in pages 45 to 69.

Temperature

The ambient temperature range of the valve is -10°C to +50°C. For Atex environments, temperature can be limited by the max ambient temperature of the coil. See coil pages.

How to Order

A complete solenoid valve is composed by 2 elements: the **valve body** and the **coil**. 201LG Series pressure vessel is supplied with the standard housing integrated. Standard housing is composed by washer, nut and nameplate.

Step 1: Select the valve body reference needed. **Example: 301LG2NVG7**

Step 2: According the coil group, select coil + voltage code from page 45. **Example: D5C**

Step 3: Define the complete assembly numbering system. **Example: 301LG2NVG7D5C**

Step 4: Please note that you can order the plug separately if not included with the coil.
Example: 600003PLUG. Please check the coil range pages for more details.

121V / 122V / 133V / 131F Series

Product Description

This complete range with 2 ways and 3 ways constructions offers a large choice of sealing. These valves can be combined with a wide range of electrical parts including Atex zone 0.

Applications

Market of interest:

- Life Sciences
- Food & Beverage Processing
- Commercial Equipment
- Industrial equipment
- Waste Water treatment

Typical applications:

- Water purification and preparation devices
- Dishwasher disinfectors, Laboratory and high end hot steam sterilizers
- Compatible aggressive liquids shut-off
- Ammonia (with silver shading ring version in option)

Benefits

The most valuable features you will find in this product range:

- FFKM seal option for superior endurance in heavy duty conditions
- Modular concept: a wide range of electrical parts can be used with this family, including ATEX, low power, IP67, UL/VDE approved
- Robust and solid design
- Large choice of sealing
- Selection for ATEX zone 0 applications
- Universal 3 ways construction available

General Description

Materials in contact with the fluid

Valve Body & Seat:

AISI 303 Stainless Steel (316L for U133V)

Other parts:

Stainless steel

Plunger:

Ferritic stainless steel

Seals (according versions):

FKM, PTFE, RUBY, PUR

Shading ring:

Copper: standard

Silver: according to notes

Installation

The valves can be mounted in any position. It is however recommended to install them with the coil in vertical position above the body. Please check compatibility with materials.

Media

These valves have been developed to achieve the best performances with a wide range of media. Check compatibility with material.

Air

Steam

Water

Oil

Temperature

For the 121V: The ambient temperature range of the valve is -10°C to +50°C.

For the 121V5x97 and 131V5x97 series: The ambient temperature range of the valve is -20°C to +65°C.

For the U133Vx97: The ambient temperature range of the valve is -25°C to +50°C.

For Atex environments: temperature can be limited by the max ambient temperature of the coil. See coil pages.

Coils

A wide range of coils can be used with this range.

The complete coil range is described in pages 45 to 69.

How to Order

A complete solenoid valve is composed by 3 elements: the **valve body**, the **housing** and the **coil**.

Step 1: Select the valve body reference needed. **Example: 121V5706**

Step 2: Select the housing depending on the protection level. **Example: 2995**

Step 3: Select the coil ref. + voltage code. Find the voltage code in coil pages starting from page 45

Example: 481865C2

Step 5: The complete assembly numbering system is : **121V5706-2995-481865C2**

Step 4: Accessories

Din Plug Connector according to DIN EN 175301-803 Form A **48658640** (batch size = 25)

221G Series

Product Description

These 2 ways valves with 316L stainless steel body and FKM sealing offer a large possibility of applications based on a wide chemical compatibility with many fluids and environments.

This range from orifice 15mm to 25mm is suitable for pressure from 0 to 16 bar and can be associated with Atex coils.

Applications

Market of interest:

- Industrial equipment
- Life Sciences
- Food & Beverage Processing
- Commercial Equipment
- Waste Water treatment

Typical applications:

- Food & Beverage processing
- Dishwasher disinfectors, sterilizers
- Aggressive liquids & environments

Benefits

The most valuable features you will find in this product range:

- High grade corrosion resistant valve body, AISI 316L
- Modular concept: a wide range of electrical parts can be used with this family, including ATEX, low power, IP67, UL/VDE approved
- Robust and solid design based on the well known 221G brass design

General Description

Materials in contact with fluid

Valve Body, seat, cover & diaphragm holder:

AISI 316L Stainless Steel

Shading ring:

None in standard

Silver for all codes type 221G6x06

Plunger :

Ferritic Stainless Steel

Other parts:

Stainless Steel

CuBe2 for all codes type 221G6x36

Seals:

FKM

Installation

The valves can be mounted in any position. It is however recommended to install them with the coil in vertical position above the body.

Media

These valves have been developed to achieve a wide range of chemical compatibilities with 316L body material and FKM sealing . Check chemical compatibilities with the fluid.

Temperature

The ambient temperature range of the valve is -10°C to +50°C.

For Atex environments, temperature can be limited by the max ambient temperature of the coil. See coil pages.

Coils

A wide range of coils can be used with this range.

The complete coil range is described in pages 45 to 69.

How to Order

A complete solenoid valve is composed by 3 elements: the **valve body**, the **housing** and the **coil**.

Step 1: Select the valve body reference needed. **Example: 221G6306**

Step 2: Select the housing depending on the protection level. **Example: 2995**

Step 3: Select the coil ref. + voltage code. Find the voltage code in coil pages starting from page 44
Example: 481865C2

Step 5: The complete assembly numbering system is : **221G6306-2995-481865C2**

Step 4: Accessories

Din Plug Connector according to DIN EN 175301-803 Form A **48658640** (batch size = 25)

Please note: Valve can be ordered according to desired configuration: Valve body and coil separately, Valve body and coil assembled or Valve body, pipe mounting adaptation kit and coil assembled (pipe mounting version)

Liquipure® Series

Product Description

Parker Liquipure® Valve Series is the ultimate solution developed by Parker, marking a new standard for Beverage Dispensing and Life Sciences appliances.

For this new valve concept we have selected lead free materials in compliance with the most restrictive standards and regulations, in accordance with Market and People expectations concerning health.

A wide range of Liquipure® valves is also NSF certified. The innovative design makes the product easy to maintain. Liquipure® is interchangeable with 32 x 32 sub base mounting solutions.

Product is available in 2/2 and 3/2 configuration, normally closed. It is also available in 3/2 Universal function making the valve applicable as diverter or selector.

An adapter kit is also offered to convert the product into a pipe mounting version. A wide range of seals is also available, including FKM-FDA, Ruby and EPDM in order to optimize compatibility with the media.

Liquipure® technology is unique, protected by patent and is a registered trademark of Parker Hannifin Corporation.

Applications

Typical applications:

- Coffee Machines, professional, semi-professional and vending
- Water purification and water preparation
- Food & Beverage processing, Healthy Beverage Dispense equipment
- Demineralized water shut off
- Dishwasher disinfectors, hot steam sterilizers

Market of interest:

- Coffee machine
- Beverage dispensing

Benefits

- Healthy and foodstuffs compatible
- Full stainless steel structure
- Wide range of Liquipure® valves is NSF certified
- Increase of reliability: reduction of welding joints
- Easy to maintain: easy and quick access to internal parts for cleaning and service

General Description

Materials in contact with the fluid:

Valve body and seat support: AISI 305 Stainless Steel

Seat: AISI 303 Stainless Steel

Plungers: AISI 430F Stainless Steel

Springs: AISI 302 Stainless Steel

Tube assembly : Stainless Steel

Main seat disc: FKM-FDA, Ruby, EPDM

Exhaust seat disc (static sealing): FKM-FDA

Adapter: AISI 304 Stainless Steel

Media

These valves have been developed to achieve a wide range of chemical compatibilities

Temperature

The ambient temperature range of the valve is -10°C to +50°C.

Installation

Valves can be mounted in any position, respecting the installation scheme. Valves have been developed to achieve the best performances with water, superheated water and steam.

Maximum recommended media temperature is 140°C.

Parker wide variety of coils including IP65 & IP67 with UL & IEC/CE-NELEC & Dual Frequency.

Each valve must be mounted using 4 screws M4 x 0,7, minimum recommended length: 6.0 mm. It is mandatory to install the valve using 4 screws, for a proper use of it.

Mounting : Sub-base features (SB)

For Valves with orifice $\varnothing < 3$ mm

For Valves with orifice $\varnothing > 4.0$ mm to 5 mm max

Easy Maintenance

Among the most innovative features of Liquipure® Valve Series you will find an easy and quick access to internal parts, without any specific tools.

The image on the right show how the seat support can be mounted and dismantled to get a quick access to the valve plunger in order to clean it or replace it after a long operating life.

How to Order

Step 1: Select the valve body reference needed

Step 2: Select the coil and the voltage code in coil pages starting from page 45

Step 3: Define the complete assembly numbering system

Step 4: accessories

Din Plug Connector according to DIN EN 175301-803 Form A **600003PLUG** (batch size = 100)

You can now identify the complete Liquipure® designation which must be used to release your order !

Please note: Valve can be ordered according to desired configuration: Valve body and coil separately, Valve body and coil assembled or Valve body, pipe mounting adaptation kit and coil assembled (pipe mounting version)

Product Description

The new 501C Stainless Steel is the right answer to complete on healthy valve range for professional coffee machine, water dispenser and vending machines.

For this new valve, we have selected lead free materials in compliance with the most restrictive standards and regulations, in accordance with market and people expectations concerning health.

Fully made of Stainless Steel, with FKM FDA robust seals, in order to give you the best Foodstuff Compatibility. This new stainless steel product family is NSF certified.

Thanks to the modular concept, a wide range of electrical parts can be used, including F Class, IP67, H Class, reduced power and UL/VDE approved.

Applications

Market of interest:

- Life Sciences
- Food & Beverage Processing
- Commercial Equipment
- Industrial equipment
- Waste Water treatment

Typical applications:

- Water purification and preparation devices
- Food & Beverage processing, Healthy Beverage Dispense equipment
- Demineralized water shut off, cooling of medical and surgical devices
- Dishwasher disinfectors, Laboratory and high end hot steam sterilizers
- Aggressive liquids shut-off

Benefits

The most valuable features you will find in this product range:

- High grade corrosion resistant valve body
- NSF certified references available
- FFKM seal option for superior endurance in heavy duty conditions
- Modular concept: a wide range of electrical parts can be used with this family, including ATEX, low power, IP67, UL/VDE approved
- Robust and solid design

These valves have been developed to achieve a wide range of chemical compatibilities

General Description

Materials in contact with the fluid

Valve Body:

AISI 303 Stainless Steel

Seat:

AISI 303 Stainless Steel

Plungers:

AISI 430F Stainless Steel

Springs:

AISI 302 Stainless Steel

Main Seat disc:

FKM, FFKM

Shading ring:

Copper

Tube assembly:

AISI 303 Stainless Steel

AISI 305 Stainless Steel

Installation

The valves can be mounted in any position. It is however recommended to install them with the coil in vertical position above the body.

Media

These valves have been developed to achieve the best performances with a wide range of media.

Temperature

The ambient temperature range of the valve is -10°C to +50°C.

Coils

A wide range of coils can be used with this range.

The complete coil range is described in pages 45 to 69.

How to Order

Step 1: Select the valve body reference needed from page 31 **Example: 501CG1GVG7**

Step 2: Select the coil and the voltage code in coil pages starting from page 45. **Example: D5B Series**

Step 3: You can now identify the complete 501C designation which must be used to release your order!
Example: 501CGV7D5B.

Step 4: Accessories

Din Plug Connector according to DIN EN 175301-803 Form A **600003PLUG** (batch size = 100)

Please note: Valve can be ordered according to desired configuration: Valve body and coil separately, Valve body and coil assembled or Valve body, pipe mounting adaptation kit and coil assembled (pipe mounting version)

Notes:

All the references listed in this chart are NSF certified.

Dimensional References:

Electrical Parts Availability:

Product line is compatible with a wide range of coils including Mono and Double Frequency solutions, 2P+E connection according with DIN EN 175301-803, Form A and flying leads versions.

X Series

Product Description

Universal 3 ways valves 1/4" NPTF with 316L material body for ATEX zones from zone 0 to zone 2 or with standard coils for non ATEX applications.

Available with manual reset.

Applications

Market of interest:

- Process
- Oil & Gas

Typical applications:

- Valve actuation control

Benefits

The most valuable features you will find in this product range:

- High grade corrosion resistant valve body, AISI 316L
- Modular concept: a wide range of electrical parts can be used with this family, including ATEX, low power, IP67, UL/VDE approved
- Robust and solid design
- Compact coils
- Easy maintenance
- Quick coil removal

General Description

Material Specifications

Valve Body:

AISI 316L Stainless Steel

Seals:

NBR

Installation

The valves can be mounted in any position. It is however recommended to install them with the coil in vertical position above the body.

Media

These valves have been developed to achieve the best performances with air & neutral gas

Temperature

The ambient temperature range of the valve is -25°C to +65°C.

For Atex environments: temperature can be limited by the max ambient temperature of the coil. See coil pages.

Coils

A wide range of coils can be used with this range.

The complete coil range is described in pages 45 to 69.

How to Order

A complete solenoid valve is composed by 2 elements: the **valve body** and the **coil**.

Step 1: Select the valve body reference needed **Example: U033X7156**

Step 2: Select the coil ref. + voltage code.

Find the voltage code in coil pages starting from page 45 **Example: 496565N7**

Step 5: The complete assembly numbering system is : **Example U033X7156-496565N7**

Step 4: accessories

Din Plug Connector according to DIN EN 175301-803 Form A **48658640** (batch size = 25)

You can now identify the complete Ux33X designation which must be used to release your order !

Please note: Valve can be ordered according to desired configuration: Valve body and coil separately, Valve body and coil assembled

Drawing 8308

Angle Seat Valves PA Series

Product Description

An angle seat valve is actuated by a pneumatically driven piston and is capable to handle slurry solutions with particles or corrosive solutions at high temperature up to 180°C and operating pressure up to 16 Bar.

Applications

Market of interest:

- Life Sciences
- Food & Beverage Processing
- Industrial Equipment
- Commercial Equipment
- Waste Water treatment
- Textile industry

Typical applications:

- Sterilizers steam supply
- Dishwasher disinfectors, Laboratory and high end hot steam sterilizers
- Pharmaceutical, Chemical & Cosmetic industry

Benefits

The most valuable features you will find in this product range:

- **Compact** design, high flow rates
- Visual **position indicator**
- For temperatures from -10°C to **180°C**
- Working pressures up to **16 Bar**
- Fluid **Viscosity up to 600 mm²/s** (600cSt, 80° E, 2700 SSU)
- Dampened closing **anti-water hammer** design (fluid under seat)
- Stainless Steel actuator housing for exceptional durability in **steam and aggressive applications**
- Valves meeting Pressure Equipment Directive 97/23/EC
- Mountable **in any position**
- Tight shut-off and Long Service Life
- Parker Angle Seat Valves conform to the terms of the 94/9/CE directive specific to non electrical equipment for use within potentially explosive environments - **zones 1/21 and 2/22**

General Description

Material Specifications

Valve Body:

ANSI 316L Stainless Steel

Seals:

PTFE/RTFE

Nozzle:

ANSI 316L Stainless Steel

Sealings:

PTFE/RTFE for seat seal material

PTFE with carbon for packing gland (EPDM for 100°C versions)

Temperature

The ambient temperature range of the valve is -10°C to +60°C.

For Atex environments: temperature can be limited by the max ambient temperature of the coil.
See coil pages.

Please note that for liquids use the versions with flow direction under the seat to avoid water hammer effect

Accessories :

- 3 Way Direct Acting AC & DC Pilot Control Valves available as separate components

Normally Closed Valve

Normally Open Valve

How to Order

Select the complete valve in the tables in next pages

Banjo Valve Mounted to the valve

Coils 22 mm for Banjo Valves Series

These coils with connection for 2 P+G DIN 43650 B plug are encapsulated in synthetic material, conform to the IEC/CENELEC safety standards and comply with European low voltage directive 2006/95/EC. Banjo Valve bodies conform to the terms of the directive 94/9/CE specific to non electrical equipment for use within potentially explosive environments - Please select appropriate Coil for Safe Area or ATEX zones 1/21 or 2/22 in the following table.

- Power: 3 W or 5 W
- Insulation Class: F (155°C)
- Degree of Protection: IP65 (with plug)
- Duty Cycle: 100% ED

Stainless Steel Air Preparation & Airline Accessories

Ball valves series

- Ball valves MB Series**
- One piece compact barstock design
 - Center off position for 3-way
 - 2-way, inline, angle; 3-way, 4-way and 5-way
 - Standard drop-in replacement
 - Patented seat design

- Ball valves B Series**
- 2-way, 3-way
 - Wide temperature application range
 - Widest variety of seats, seals and port connections

For more details refer to catalogue: 4121-BV

Diaphragm valve

- Diaphragm Valve NOVA Series**
- General purpose, high cycle, compact valve
 - For regular outlet valve, gas control panels and analyser sampling system applications.
 - Handwheel, lever and indicating handwheel options

For more details refer to catalogue: IPD 4515

Filter & Check valve

- Filter FT series**
- Filter elements are easily replaced without disconnecting the tube lines
 - Fast Loop bypass option enables a continuous self cleaning flow

- Check valves C series**
- Resilient, custom molded, seat design
 - Back stopped poppet to minimize spring stress
 - Cracking Pressures: 0.02 to 7 bar
 - Various port connections male and female BSP, NPT...

For more details refer to catalogue: IPD 4135-CV

Relief valve

- Professional Relief valve 20XXG series**
- Easy to adjust, precise setting variation
 - Easy to install, minimum size
 - Adjusting screw protected by user
 - Highest repeatability of cracking pressure
 - Minimized leakage preventing waste of media

For more details refer to catalogue: FCDE 5531UK

Quick-Acting Couplers

- Compact design
- Corrosion resistance
- Mainly used for applications in the areas of compressed air and liquids
- Optimally suited to use with liquid and aggressive media

For more details refer to catalogue: CAT/3800-Legriss

FRLs

- Suitable for Marine & Offshore applications
- Chemical / Petroleum and process industries
- Coalescing filters are designed for removing oil and water aerosols down to 0.01µ
- Suitable for food industry applications

For more details refer to catalogue: PDE2504TCUK

Push-In Fittings

- Extreme chemical and mechanical resistance for severe conditions: food industry, chemicals, medical...
- Fittings suitable for permanent food contact
- Hygienic external design for reducing retention zones
- Proven gripping technology
- Manual connection and disconnection, no tools required
- 100 % leak-tested in production

For more details refer to catalogue: CAT/0570

Compression Fittings

- Excellent resistance to environmental conditions and corrosive fluids
- Pressure and temperature resistant
- Withstand strong vibration and water hammer

For more details refer to catalogue: CAT/0570

COILS FOR
DIN PLUG CONNECTION

COILS 32 mm

These coils can be mounted with every Parker solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

This is an encapsulated assembly comprising a coil, integral magnetic iron path and snap-on plug connection.

The synthetic material encapsulation provides an effective compact housing, offering full protection against dust, oil, water, etc.

Ease of mounting in confined space - offers shock and corrosion protection - simplifies conversion of existing equipment to other requirements, etc.

Coils conform to the IEC/CENELEC safety standards and complies with European low-voltage directive.

Specification		Standard		Double frequency			
Ref. (without DIN plug)		481865		483510			
Ref. (with DIN plug)		482725		482635			
Coil Group		2.0 / 2.1					
Degree of protection		IP65 according to IEC / EN 60529 standards (with DIN plug).					
Class of insulation		F 155°C					
Electrical connection		The coil is connected with a 2 P + E plug according to EN 175301-803 type A					
Ambient temperature		-40°C to +50°C The application is limited also by the temperature range of the valve.					
Elect. Power	DC	Pn (hot)	9 W				
		P (cold) 20°C	12 W				
	AC	Pn (holding)	8 W	9 W			
		Attraction cold	26 VA (9 W)	32 VA (10 W)			
Weight		130 g (without plug)					
Voltages "Un"		VAC/Hz	Code	VDC	Code	VAC/Hz	Code
-10% to +10% of the Un		24/50	A2	12	C1	24/50, 24/60	P0
		48/50	A4	24	C2	48/50, 48/60	S4
		110/50	A5	48	C4	110-115/50, 120/60	S5
		220-230/50	3D	110	C5	220-240/50, 240/60	S6
		230/60	J3				

To Order a Coil choose Coil Ref + Voltage Code, example: 481865 for 24 VDC = 481865C2

More voltage possibilities can be found in the table of voltage codes at the end of the coil section.

These coils must be used with suitable housings, see example below:

The coil assembly kit Ref. 2995 corresponds to the "housing" of Lucifer® valve numbering system (Valve - housing - coil/voltage).

It is composed of a nameplate giving details of the valve type, a round washer and a nut to ensure the fixing between 32 mm coil and the valve.

EXPLOSION PROOF ELECTRICAL PARTS

NON SPARKING PROTECTION
ELECTRICAL PARTS "nAc nCc"

ELECTRICAL PART 32 mm

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.
See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex nAc nCc IIC T3/T4 is required.
Ease of mounting in confined space - offers shock and corrosion protection-simplifies conversion of existing equipment to other requirements, etc.

Benefits:

The synthetic material encapsulation of the coil provides an effective compact housing, offering full protection against dust, oil, water, etc.
Small size for ease of mounting in confined spaces.

				220/50-230/50	3D		

To Order a Coil choose Coil Ref + Voltage Code, example: 482605 for 24 VDC = **482605C2**

* 482606.160 - 6 m cable length - available only in C2 and 3D

* 482606 - 1.5 m cable length

Fuses:

Both electrical parts 482605 & 482606 have to be connected in series with a safety fuse according to CEI 60127-3. Indicating example below:

482605:

DC: 12 V, 1000 mA - 24 V, 500 mA - 48 V, 200 mA - 110 V, 100 mA
 AC 50 HZ: 24 V, 500 mA - 48 V, 250 mA - 110/115 V, 100 mA - 220/230 V, 3 mA
 AC 60 HZ: 24 V, 630 mA - 110/115 V, 125 mA - 220/230 V, 63 mA

482606:

DC: 12 V, 400 mA - 24 V, 200 mA - 48 V, 100 mA - 110 V, 50 mA
 AC 50 HZ: 24 V, 250 mA - 48 V, 125 mA - 110/115 V, 63 mA - 220/230 V, 32 mA
 AC 60 HZ: 24 V, 315 mA - 110/115 V, 63 mA - 220/230 V, 32 mA

ZONE 0/20

483580 - 483960 ELECTRICAL PARTS 32 mm "IS"

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.
See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex ia IIC T6 is required.

Benefits: Fully encapsulated assembly comprising a coil, metal armature, three diodes circuit and DIN plug connection.
The encapsulation provides an effective compact housing offering full protection against dust, oil, water, etc. Small size for ease of mounting in confined space. Available only in 28 VDC (suffix code : N7)

Reference (without plug) (with plug)	48358001 48396001	
Certificate	LCIE 02 ATEX 6065 X - IECEx LCI 07.0025 X	
Coil Group	7.0	
Type of protection	Gas	II 1 G - Ex ia IIC - T6
	Dust	II 1 D - Ex ta IIIC - T80°C
Degree of protection	IP65 with plug according to IEC/EN 60529 Standards	
Ambiant temperature	- 40°C à + 55°C The operating temperature of the valve/coil can be limited by that of the valve.	
Electrical connection	The coil is connected with a 2P + E plug according to EN 175301-803 type A Contact 1 is marked as the positive pole ⊕.	
Maximum supply voltage	28 VDC (N7) - 110 mA The minimum operating voltage at maximum 60°C is 14 VDC.	
Power	DC	Minimum
		Maximum
		500 mW 3 W
Depending on applied voltage, IS barrier type and resistance of connected cable		
Coil resistance at 20°C	340 Ω	
Impedance	340 Ω	
Apparent inductance	0 mH	
Apparent capacitance	0 μF	
Weight	160 g (with plug)	

To Order a Coil choose Coil Ref + Voltage Code, example: 483580 for 28 VDC = 483580N7

These coils must be used with suitable housings, see example below:

The coil assembly kit **Ref. 2995** corresponds to the "housing" of Lucifer® valve numbering system (Valve - housing - coil/voltage). It is composed of a nameplate giving details of the valve type, a round washer and a nut to ensure the fixing between 32 mm coil and the valve.

Important

The intrinsically safe supply circuit should have enough capacity in all environmental conditions to assure a **minimum operating current of 35 mA** through the coil.

The minimal holding current is 20 mA.

For the barrier compatibility see the corresponding table in in appendix section.

These coil must be used with suitable housing : **Ref. 2995**

495910 - MINIWATT - 0.3 W ELECTRICAL PARTS "IS" "BOOSTER" 37 mm

These coils can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.

See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex ia IIC T4 to T6 is required.

Benefits: Rotatable 360° fibreglass-reinforced plastic housing (class H). Solenoid coil, rectifier (silicium diodes), fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection. Small size for ease of mounting in confined space. Available only in 28 VDC (code: N7).

Reference	495910	
Certificate	LCIE 03 ATEX 6464 X - IECEx LCI 07.0006 X	
Coil Group	8.0	
Type of protection	Gas	II 1 G - Ex ia IIC - T4 / T5 / T6
	Dust	II 1 D - Ex ta IIIC T80 / 95 / 130°C
Degree of protection	IP67 according to IEC/EN 60529 Standards	
Ambient temperature	- 40°C to +80°C / 75°C / 65°C The application is limited also by the temperature range of the valve..	
Class of insulation	H 180°C	
Electrical connection	Electric connection is done in the connection box on an easily accessible connector terminals. The introduction of the cable (Ø min 7 mm, Ømax. 11 mm, section max. 2.5 mm ²) in the connection box passes by the built in M20 x 1.5 cable gland	
Maximum supply voltage	28 VDC (N7) - 110 mA	
Power	DC	Minimum
		Maximum
0.3 W (with 13 VDC)		
1.2 W (with 24 VDC)		
Depending on applied voltage, IS barrier type and resistance of connected cable		
Line check	4 mA or 5 VDC max	
Coil resistance at 20°C	Charge ~ 550 Ω - Holding ~ 500 Ω	
Impedance	0 mH

492965 ELECTRICAL PARTS "BOOSTER" "IS" 50 mm

This coil can be mounted with every Parker ATEX solenoid valves corresponding to the specified Coil Group.
See column "Coil Group" within valve pages.

Application: Control of solenoid valves in dangerous areas where explosion-proof protection Ex ia IIC - T6 is required.

Benefits: Rotatable 360° fibreglass-reinforced plastic housing. Solenoid coil, fuses and varistor protection are completely encapsulated into the coil housing by epoxy resin for shock and corrosion protection. Small size for ease of mounting in confined space. Simplifies conversion of existing equipment to hazardous area requirements. Small size for ease of mounting in confined space. Available only in 28 VDC.

Reference	49296501 - (Stainless steel fixation) 49296502 - (Plastic fixation)	
Certificate	LCIE 02 ATEX 6066 X - IECEx LCI 07.0007 X	
Coil Group	9.0	
Type of protection	Gas	II 1 G - Ex ia IIC - T6
	Dust	II 1 D - Ex ta IIIC - T80°C
Degree of protection	IP66 according to IEC/EN 60529 Standards	
Ambiant temperature	- 40°C to +65°C The application is limited also by the temperature range of the valve.	
Electrical connection	Cable connection through a plastic or stainless steel cable gland M20 x 1.5 allowing use of cable diameter from 10 to 12 mm. Additional earth connection possible with external screw terminal.	
Class of insulation	H180°C	
Maximum supply voltage	28 VDC (N7) - 110 mA	
Power	DC	Minimum
		Maximum
0.3 W (with 13 VDC) 2.3 W (with 24 VDC)		
Depending on applied voltage, IS barrier type and resistance of connected cable		
Line check	4 mA or 5 VDC max	
Coil resistance at 20°C	85 Ω	
Impedance	275 Ω (with 13 VDC) - 260 Ω (with 24 VDC)	
Apparent inductance	0 mH	
Apparent capacitance	0 μF	
Response time	2 - 4 s	
Weight	500 g	

To Order a Coil choose Coil Ref + Voltage Code, example: 492965.01 for 28 VDC = 49296501N7

Important

The intrinsically safe supply circuit should have enough capacity in all environmental conditions to assure a **minimum operating current of 29 mA** through the coil.

The minimal holding current is 20 mA.

For the barrier compatibility see the corresponding table in appendix section.

Housing

COIL GROUP

4538

WATERPROOF AND DUSTPROOF HOUSING

Waterproof housing:

Reference:	4538
Material:	Epoxy varnished steel
Degree of protection:	IP according to IEC/EN 60529 IP 67 with cable gland
Electrical connection:	Cable connection by cable gland M20x1.5 according to DIN 46320. Cable with outer diameter 6.5 - 13.5 mm can be simply sealed using a rubber gland with resilient sealing rings. The enclosure is internally and externally fitted with grounding and earthing screw terminals.
Weight:	180 g

Benefits:

This enclosure is dust- and waterproof. It corresponds to the degree of "International Protection" IP 67 according to IEC / EN 60529. Corrosion resistant, the metal housing offers good protection for the coil against shocks and other outside influences - rotatable 360° - easy mounting in confined spaces - easy access to the screw terminals - single-nut mounting - light weight - simple conversion of existing electrical equipment to other requirements without interruption of fluid passage in the valve.

Application:

This housing can be equipped with several coils of our range, like the standard, high temperature, double-frequency and magnetic latch coils.

Compatible coils:

- **481000 - Standard Coil**
8 W Class F (155°C)
- **483520 - Double-Frequency Coil**
9 W Class F (155°C)
- **486265 - High Temperature & High Power**
14 W Class H (180°C)

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374
